

How to Install the Oracle Client software for Pathlore Oracle Patchset 4505133

(Basic Install)

*****NOTE – For a new installation, download the software for the Oracle Client software for Pathlore (Basic Install) from the download site and follow the instructions to install it before installing this Oracle Patchset.**

1. Download the Oracle client software from the **MELMS Software Download** web site. The userid and password were provided with the email describing the updates to the web site.

Locate this link on the website to download the software for Oracle:

“To download the Oracle Software, click here to begin the download process.”

A file download box will open with the text:

Do you want to save this file: Name **“Oracle Patchset 4505133.zip”**?

Save this file to the **C:\temp** directory or wherever you prefer to install it from (ie: network drive etc).

Note: The rest of the instructions will be written for an install location of **(C:\temp)**.

2. Navigate to Start\Control Panel\Administrative Tools**Services**
 - Go to the **Oracle MTS Recovery Service** and click **“stop the service”**.
3. Navigate to the **C:\temp** directory. Locate the **“Oracle Patchset 4505133.zip”** file and extract it to back to the **C:\temp** directory using the program **“Winzip”**.

Navigate to the **“C:\temp\ Oracle Patchset 4505133\Disk1\install “** folder.

Double click the **setup** file

Note - An "open file - security warning" window may open. If so, click "run".

4. The **“Oracle Universal Installer”** window opens in a Command window with the message at the bottom of the screen: **“Preparing to launch Oracle Universal Installer from.... please wait...”**

5. The Oracle Universal Installer **“Welcome”** screen opens with the messages:

The Oracle Universal Installer guides you through the installation and configuration of your Oracle products.

Click [**Next**]

6. The “**Specify file locations**” window opens.

Under the **Source** heading, keep the default path of:

Path: “**C:\temp\Oracle Patchset 4505133\disk1\stage\products.xml**”

Under the **Destination** heading, change the default **name** (by selecting it from the dropdown window on the right) to:

Name: **oraclient10g_home1**
Path: **C:\Oracle\product\10.1.0\client_1**
Click [**Next**]

The progress bar at the top right of the screen displays:

“**Loading products list. Please Wait**”

7. The “**Summary**” screen opens and lists a summary of the selected components.

*Note – The screen should say “Oracle Database 10G Patch Set 3 10.1.0.5.0 under the word SUMMARY.

Click [**Install**]

8. The “**Install**” Screen opens.

The Install progress bar is displayed on the screen and shows the files being loaded etc.

The text “**Copying files for Patch of Windows JDK 1.4.2.0.8**” is shown.

9. The “**End of Installation**” screen opens

Click [**Exit**]

A smaller Exit screen opens with the text:

Do you really want to exit?

Click [**yes**]

10. Navigate to Start\Control Panel\Administrative Tools**Services**

Go to the Oracle MTS Recovery Service and click “**start the service**”.
